TWO-WEEK SUMMER PROGRAMS ABROAD FOR FUTURE HEALTH PROFESSIONALS

A COMPREHENSIVE PACKAGE OF CLINICAL EXPERIENCE, ETHICAL LEADERSHIP, COMMUNITY SERVICE AND PERSONAL CHALLENGE
SHADOW A DOCTOR

40 HOURS ON THE HOSPITAL FRONT LINE

Medical and nursing school are big commitments, and shadowing in a working hospital can be a great help in deciding whether they are for you.

You’ll gain over 40 hours of clinical experience, seeing first-hand the incredible achievements of a medical team in challenging conditions.

Shadowing somewhere as different as Dominican Republic complements and contrasts your experience at home, providing a unique insight into global health systems from Emergency and OR to Maternity and Infectious Diseases.

Our close relationships with doctors who are passionate about inspiring the next generation, and the fact we pay them to serve as mentors, create a strong learning environment – and ensure you’re kept safe.

Outside the hospital, we provide Global Health Seminars to help you understand and interpret what you see while shadowing, and our Student Coordinators are there to guide you all the way.

CHALLENGE YOURSELF

TRAVEL & IMMERSE YOURSELF IN A NEW CULTURE

Getting out of your comfort zone can be scary, but it’s the best way to discover the confidence, independence and communication skills you’ll need to develop as a health professional.

Traveling to a foreign land, living with your peers from around the world and experiencing a different way of life will challenge you – that’s the point. If you’re ready to meet that challenge, it will be an unforgettable journey of self development.

With 10 years’ experience and over 12,000 alumni students, it’s our job to support you on your journey. After an intense shift in the hospital, our exclusive student guesthouse is your sanctuary; a safe space to relax among new friends, with the welcoming faces of our professional team there for you 24 hours a day.

BE AN ETHICAL LEADER

SHOW YOU HAVE THE HIGHEST STANDARDS

Shadowing abroad is a valuable learning experience, but it must not mean compromising the professional ethics and standards you’ll uphold at home.

Our strictly observation-only program (students are not allowed any physical patient contact) allows you to get as close as safely possible to the clinical front line, without crossing those all-important boundaries.

Having Doctors paid to provide continuous student supervision, our team of professional Student Coordinators, and our rigorous hospital partnerships, gives us the control we need to ensure professional ethics are upheld to American standards and AAMC compliant.

We also provide comprehensive student briefing on getting the most out of the experience safely and respectfully.

SERVE A COMMUNITY

MAKE A REAL CONTRIBUTION AS YOU LEARN

You will directly help to improve access to healthcare for local people, as a proportion of your program fee goes directly to the hospital to buy much-needed resources.

Our community service program will invite you to give back to the community through activities such as cleaning plastic from local beaches, preparing meals in a shelter for the homeless or helping in local orphanages.

Around half of our Program Team are locals from Dominican Republic. Their knowledge and connections help us to identify genuine need and work with projects doing real good.
