

## **Clinical Nursing – Sample Skill Scenario**

### **Competitor Scenario 1:**

You are working at the HOSA Celebration Hospital. Your patient, S. White, is 55 years old. The patient is to have their peripheral IV access discontinued.

**Skill to be performed:**

**Skill IV: Discontinuing Peripheral IV Access 8 minutes**

**Time - 8 minutes**

### **Judge Script:**

When the competitor has lifted the gauze and assessed bleeding (Step # 13) *judge states “No bleeding or hematoma formation”.*

### **Competitor Scenario 2:**

You are working at the HOSA Celebration Hospital Emergency Department. Your patient, B. Lightyear, is 65 years old. The patient is experiencing dyspnea and decreased oxygen saturation level due to COPD. The patient also has significant hearing loss in the left ear. The patient is ordered continuous 2 L O<sub>2</sub> via nasal cannula.

**Skill to be performed:**

**Skill VI: Applying a Nasal Cannula or Oxygen Mask**

**5 minutes**

### **Patient Script:**

You are B. Lightyear and are 65 years old. You have presented at the HOSA Celebration Hospital with dyspnea and decreased oxygen level. You have a history of COPD. Answer any questions that are asked but report that talking makes you short of breath. You have significant hearing loss in your left ear. If the competitor speaks toward your left ear or does not face you, ask them to repeat.

The competitor will be applying a nasal cannula for simulated oxygen delivery.
