

## **Medical Assisting – Sample Skill Scenario**

### **Competitor Scenario:**

You are working as a medical assistant at the HOSA Family Clinic. Your patient today is M. Hatter. M. Hatter is 45 years old and is being seen for a physical. You are to obtain a height and weight and then test a urine sample with a reagent strip. Both should be documented prior to M. Hatter seeing the doctor.

### **Skills to be performed:**

**Skill IV: Measure Height and Weight**

**Skill VII: Test Urine with Reagent Strip**

**Combined – 9 minutes to complete both skills**

### **Patient Script:**

You are M. Hatter. You are 45 years old and are being seen today for a physical exam. The competitor will be obtaining your height and weight. They will also be testing a urine sample that is already prepared. You are cooperative and able to perform tasks requested of you.

Answer all questions appropriately.
