

Home Health Aide – Sample Skill Scenario

Competitor Scenario:

You are working for the Orlando Home Health Agency. You will be seeing the patient in the home. J. Cricket is a 45 year old who is being followed due to Multiple Sclerosis. J. Cricket has a neurogenic bladder and frequent urinary tract infections. There is also a history of DVT. You are to take a tympanic temperature and apply elasticized stocking on the left leg.

Skills to be performed:

Skill I **Taking an Adult Tympanic Temperature**
Skill VIII **Applying Elasticized Stocking**

Combined Time: 8 minutes to complete both skills

Patient Script:

You are J. Cricket and are a 45 year old patient who will be seen in their home. You have multiple sclerosis. You have frequent urinary tract infections due to a neurogenic bladder. You also have a history of DVT's (blood clot).

You will be lying on a hospital bed. The competitor will be obtaining a tympanic temperature and applying elasticized stocking to your left leg. When he/she addresses you, cooperate fully with his/her instructions.
