Health with heart.

Yes, we serve millions of people in thousands of locations across the country. But what really matters is the size of our heart. Because every day, in every way, we are passionate about bringing our heart to every moment of your health.

We are proud to support HOSA-Future Health Professionals.
An unparalleled view from inside the U.S. Pandemic response . . .

**Memoir of a Pandemic**
*Fighting COVID from the Front Lines to the White House*
**Brett P. Giroir, MD**

In January 2020, Admiral Brett P. Giroir, MD, was among the first federal leaders tapped to handle the reintegrations of US citizens from Wuhan, China, in the earliest days of what became the COVID-19 pandemic. As such, he was one of the few to see what everyone believed were the only Americans exposed to the novel virus at the time. Ultimately, Giroir would be called to serve on the White House Coronavirus Task Force under President Donald Trump.

Rather than an exhaustive and comprehensive history of the pandemic response, this memoir adds to the historical record through personal narrative and by contextualizing several key inflection points. Giroir reflects upon his time on the front lines of the early cruise ship outbreaks and makeshift hospitals to the Situation Room in the White House. He explains the complex backdrop of personalities, policies, and politics that influenced critical decisions as the pandemic developed. In doing so, he also shines a light on the unknown characters who played critical roles in the national COVID response, the personalities and conflicts involved, the intense debates about policies and perceptions, and the decision-making processes that led to our national plan—for better or worse.

Giroir concludes that overcoming a pandemic is not as easy as merely replacing a president or “following the science.” The inescapable fact is that the human species will remain vulnerable to pandemics, even more so in the future because of factors both natural and human influenced. Our ability to respond to future pandemics will depend on the adequacy of our preparation, the capabilities and relationships of individual leaders, and the inevitable politics of the day. For now, an important retrospective of what we did, both right and wrong, is imperative.

*Joseph V. Hughes Jr. and Holly O. Hughes Series on the Presidency and Leadership*

**BRETT P. GIROIR** is the former assistant secretary for health in the US Department of Health and Human Services, acting FDA commissioner, and admiral in the US Public Health Service Commissioned Corps. He also served as the US representative to the executive board of the World Health Organization and was a member of the White House Coronavirus Task Force and the national lead for testing and diagnostics under the Trump administration. He resides in College Station, Texas.

Career of a lifetime

HCA Healthcare is proud to support HOSA students through its annual Philip R. Patton HCA Healthcare Scholarship. In 2023, we are excited to help 15 new students kickstart their healthcare careers. Interested in learning more about the many ways HCA Healthcare supports students and its colleagues? Scan the QR code below or visit Careers.HCAHealthcare.com/HOSA.

Let us support your chosen profession

Whether you’re interested in becoming a physician, nurse, member of the clinical staff, an information technology professional, executive, or administrator, there is a place for you at HCA Healthcare. Join us to build skills, get hands-on experience and access the training and education needed for a career of a lifetime.

Let us help you enhance your career

The HCA Healthcare-Galen Grant significantly reduces tuition costs for its online RN to BSN program and two different online masters degrees in nursing, nursing education and healthcare leadership.

Let us make it easy to further your education

Colleagues can receive up to $5,250 in tax-free reimbursement each year for eligible higher education expenses.

Scan the QR code for more information
HOSA-100

The HOSA-100 National Advisory Council serves as a vital champion of HOSA-Future Health Professionals.

Council members provide HOSA with their professional expertise; their diverse knowledge of perspectives; their connections to local, state, national or international resources, or colleagues; their philanthropic support or other valued assistance. They promote HOSA-Future Health Professionals as the pathway for young people interested in the pursuit of careers in health beginning in middle or high school and continuing in postsecondary and collegiate institutions.

HOSA HONORARY LIFE MEMBERSHIP AWARDS

Presented at the Opening Session, Wednesday June 21 at 7:30 PM CDT

The nominees have made a significant contribution to the growth and improvement of HOSA-Future Health Professionals or provided financial and/or other support to one or more special HOSA initiatives.

Jim Scott started his journey in 1970 as a student placed in a CTE class and joined a CTSO. His sole ‘goal’ was to graduate from high school and prepare for a minimum wage job and survive in a coal mining, steel mill town in Western Pennsylvania. The school system had Mr. Scott pegged as a potential dropout candidate. The guidance counselor told his CTE instructor... “Don’t expect much from him!”

Fortunately, the CTE instructor did not follow the advice and placed his belief in Mr. Scott as a potential leader. Because of his instructor’s belief and encouragement, Mr. Scott completed two college degrees. Mr. Scott’s experiences in CTE catapulted him toward a career as a CTE educator and CTSO advisor. Even though his career experiences were not in the health professions, he was surrounded by family members in healthcare.

Among his major accomplishments: Membership Exceeded Prior Years by 15%; HOSA Diversity Rate Climbed to 60%; First In-Person ILC since the Pandemic-attracted 10,687; 342 state and chapter officers, and members attended WLA 2022; 22 new HOSA State Advisors were welcomed in 2022-2023; 44 State Associations were represented at SAM 2022; HOSA Partnerships and Sponsorships greatly increased; HOSA survived the pandemic financially with no loss of staff or services; the Succession Plan for Executive Director was well-conceived; finally, HOSA-Future Health Professionals proved it is a significant partner in building a global pipeline filled with qualified future health professionals.

Peyton Holland has demonstrated extraordinary support to the mission of HOSA-Future Health Professionals through his service as Executive Director of the National Technical Honor Society.

With unwavering commitment and passion, Peyton Holland has made significant contributions to the advancement of HOSA members into healthcare by providing educational scholarships to pursue their career goal to become a future health professional. By encouraging HOSA Advisors to establish NTHS affiliated chapters and by offering scholarships to HOSA members to be the best they can be in pursuing careers in the health professions, the leadership of HOSA is most appreciative of the encouragement and investments of Mr. Holland and the National Technical Honor Society in future health professionals!
GOODHEART-WILLCOX OUTSTANDING SERVICE AWARD

Presented at HOSA’s Recognition Session on Friday, June 23 at 7:30 pm

The Goodheart-Wilcox Outstanding Service Award recognizes three local HOSA chapter advisors, one from each HOSA region, who have made exceptional contributions of local, regional, state, and national significance to the promotion, development, and progress of HOSA-Future Health Professionals.

HOSA-Future Health Professionals thanks Goodheart-Wilcox for supporting HOSA’s local advisors and sponsoring this award.

The U.S. Presidential Scholars Program was established in 1964, by executive order of the President, to recognize and honor some of our nation’s most distinguished graduating high school seniors. In 2023, thirteen HOSA members were recognized as Presidential Scholars:

Tej Sandeep Desai  
Paradise Valley High School, Arizona

Suhani Bhatt  
Newark Charter School, Delaware

Sahil Sood  
Lambert High School, Georgia

Amogha Medha Paleru  
Carmel High School, Indiana

Eshaan S. Chandani  
Johnston High School, Iowa

Katherine Chen  
Mountain Lakes High School, New Jersey

Nipun Gorantla  
Marvin Ridge High School, North Carolina

Srinath B. Kandooru  
Century High School, North Dakota

Kaylee Mae Kirkeby  
Grand Forks Central High School, North Dakota

Jay G. Patel  
Butler Tech Bioscience Center, Ohio

Sanjana M. Velu  
William Mason High School, Ohio

Mara Wren Klein  
Gatlinburg-Pittman High School, Tennessee

Ananya Bhatt  
Brookfield Central High School, Wisconsin

Any student who is a HOSA member graduating from high school or completing their postsecondary/collegiate program is eligible to become a HOSA Lifetime Alumni Member. HOSA has made membership FREE to strengthen the organization and keep former members connected. Membership provides the following benefits: receive exclusive discounts on insurance, travel and education, create professional networking opportunities, stay connected with the HOSA E-Magazine and Alumni Newsletter, conduct workshops, serve as judges at state and national leadership conferences, serve as a mentor to a HOSA member and be involved in state and national activities.

ACTIVATE YOUR FREE LIFETIME HOSA ALUMNI MEMBERSHIP TODAY.

Explore Our Health Science Solutions

Inspire student connections, explorations, and achievement in Health Science with the power of our content and interactive digital resources. Visit our complete Course Guide at NGL.Cengage.com/HealthScienceCG.

Introduction to Health Science

DHO Health Science, 9e
Simmers, ©2022
The leading program for introductory courses in Health Science covering foundational career exploration and fundamental knowledge and skills.

Introduction to Health Care, 5e
Mitchell / Haroun, ©2021
An easy-to-read introduction to Health Science careers and the basic clinical skills needed for learners entering health care programs.

Anatomy & Physiology

Body Structures and Functions, 14e
Scott / Bell, ©2022
A rich and well-designed program with diverse representation to study the basics of the human body and how it functions.

Medical Terminology

Medical Terminology for Health Professions, 9e
Ehrlich, ©2022
A program designed to simplify memorizing complex medical terms with effective practice exercises and an amazing Pronunciation App.

Cengage MindTap

MindTap is the online solution for CTE courses, including: a full, interactive eBook, annotation and study tools, video and simulations, certification prep, auto-graded assessment, data analytics, and more.

MindTap Med Term Pronunciation App

The MindTap Pronunciation App allows students to record and receive instant feedback on their ability to pronounce key medical terms.

learninglab MindTap Learning Labs

Allow students to practice the most difficult concepts associated with their textbooks in a simulated, real-world environment. Developed to improve program quality and retention, Learning Labs prepare students for their health careers by increasing comprehension, critical thinking, and soft skills.

What We Do

SAMHSA’s mission is to lead public health and service delivery efforts that promote mental health, prevent substance misuse, and provide treatments and supports to foster recovery while ensuring equitable access and better outcomes.

SAMHSA envisions that people with, affected by, or at risk for mental health and substance use conditions receive care, thrive, and achieve wellbeing.

How We Do It

- Provide grant funding opportunities and guidance to states and territories, as well as tribal and local communities;
- Provide technical assistance to grantees and practitioners;
- Publish and share resources for individuals and family members seeking information on prevention, harm reduction, treatment, and recovery;
- Collect, analyze, and share behavioral health data;
- Collaborate with other Federal agencies to evaluate programs and improve policies; and
- Raise awareness of available resources through educational messaging campaigns and events.

Priorities and Guiding Principles

SAMHSA’s priorities focus on five key areas:

1. Preventing Overdose
2. Enhancing Access to Suicide Prevention and Crisis Care
3. Promoting Resilience and Emotional Health for Children, Youth, and Families
4. Integrating Behavioral and Physical Health Care
5. Strengthening the Behavioral Health Workforce

We are guided by four principles throughout each priority area: equity, trauma-informed approaches, recovery, and commitment to data and evidence.

For more information on SAMHSA grants, programs, products, and data, visit SAMHSA.gov.

To join our team, visit samhsa.gov/join-us.
In addition to supporting physical therapists and physical therapist assistants across the country, APTA also works to provide resources, information, and guidance for prospective students and advisors.

To learn more, visit apta.org/your-career.
There’s much to do at the HOSA ILC — take advantage of these exciting interactive exhibits in Exhibit Hall E, during HOSA Expo hours!

HOSA Expo Hours: Wednesday, June 21, 9 a.m. – 5 p.m. | Thursday, June 22, 9 a.m. – 5 p.m. | Friday, June 23, 9 a.m. – 2 p.m.

**U.S. Army Interactive Exhibit**
Ongoing during HOSA Expo hours.
HOSA members and advisors are invited to visit the U.S. Army exhibit booth to speak with Army doctors and nurses about education opportunities and serving on the U.S. Army healthcare team. Check out a fully equipped medical DRASH tent, test your strength with a fitness challenge, create a personalized dog tag and complete an action-packed soldier mission in the virtual reality “Immersa-Dome” which allows you to become immersed in the sights, sound and smells of Army Special Forces Operations.

**Virtual Patient Challenge**
The Virtual Patient Challenge is an exciting competition for students! It challenges them to act as healthcare professionals and interact with a virtual patient that needs their help. Gather a team of HOSA members, bring your Advisor, and join us for an exciting learning experience. You’ll have the chance to win a free Body Interact license for your school!

**Anatomage Team Tournament!**
Ongoing during HOSA Expo hours.
Come by and watch teams compete in the Anatomage Team tournament. Anatomage develops innovative 3D medical imaging technology solutions for the healthcare and education industries. Anatomage Tables are used in thousands of hospitals, universities and high schools to offer a hands-on, cadaver experience with tools like the scalpel to virtually dissect a real human cadaver. We include 4 real cadavers to visualize all human body systems and a pathology case library to dissect real patients.

**Acadian Ambulance Service**
Ongoing during HOSA Expo hours.
Acadian Ambulance Service will be bringing an ambulance for students to tour and interact with. Come see first-hand the equipment used by paramedics and EMT’s and visit with staff from Acadian to learn more about career opportunities!

**Carter BloodCare**
There is a never-ending need for blood donors. Come by the Carter BloodCare booth and take the opportunity to give blood.

<td><strong>Overview of Health Disparities &amp; Strategies for Achieving Health Equity in Rural Communities</strong> Health inequities in rural areas are well-documented. Research shows that some gaps between rural and urban populations in health status and outcomes have increased over time. Health disparities exist between rural and non-rural communities and between subgroups within rural communities, such as Black people, American Indian and Alaska Native people, people of color; LGBT+ individuals; communities living in the U.S.-Mexico border region; migrant farmworkers; and other communities. Working to advance health equity can positively affect the well-being, economy, and social environment of rural communities. This workshop will provide an overview of health equity and introduce some unique challenges that rural communities may face when addressing health equity. Important background information related to rural health disparities and strategies to advance health equity in rural communities will be discussed.</td>

Thursday - 9:00 AM Continued...

**Martin Gitonga**  
Director-Surgical Services  
Medical City Dallas Hospital

**Application of Robotics in Surgery**  
A look at robotics and their application in surgery. Featuring Intuitive, Mako and Rosa in Gynecological, Urology, general, Transplant, Orthopedics and Neurosurgery.

**Wade Delk**  
Director  
International Joint Commission on Allied Health in Ophthalmology

**An Eye-Opening Career—Ophthalmic Medical Technician**  
This stimulating workshop will shine the light on the career aspects of the ophthalmic medical technician, a little known, well-respected, and greatly in demand profession. Interactive methods will be used to demonstrate how a technician tests vision, and what else they can learn about a person’s health while examining the eye. The tools and techniques ophthalmic technicians use to assist the ophthalmologist in the clinic and surgical setting will also be highlighted. You will learn what it takes to become an ophthalmic medical technician, what it means to be one, and how to become a part of a life-long and rewarding career field.

Director, CTE  
McGraw Hill

**What Do Curriculum Media Publishers Need to Know to Help You?**  
There are many solutions for curriculum and materials needs in the Health Science education space. McGraw Hill has several. As we develop more and more curriculum for Health Science, we want to know what you wish we knew! What are features you wish were provided but are not? What areas of content are not well-addressed? What problems are you trying to solve that for which we can help?

Come join us for fun and information sharing. We will bring our “listening faces” and hope that you will provide input that will help educators across the United States!

**Kellie Stark**  
Education & Outreach Program Manager  
Army Healthcare Recruiting

**Day in the life of an Army Healthcare Professional**  
Do you have what it takes to become a U.S. Army Physician?

Army Healthcare Professionals will discuss their expertise and Army story and provide information about Army Healthcare Education Programs and Incentives.

Whether you choose to serve as an Active duty or Army Reserve Soldier, we encourage those interested in becoming a health care physician, surgeon, nurse, veterinarian, dentist or specializing in any medical field to expand their horizons and pursue their career goals through professional growth, scholarships and many continuing education programs. The Army’s Health Professions Scholarship Program (HPSP) provides one- to four-year scholarships covering your full tuition at an accredited college or university of your choice, a monthly stipend of more than $2,500, required fees for medical school and reimbursement for other allowable expenses. Qualified graduate school students are also eligible to receive a $20,000 sign-on bonus. Come and learn how the US Army Medical Department can help fund your education so you can concentrate on being a successful health care professional without the debt.

Thursday - 9:00 AM Continued…

Krishna Palipudi, Ph.D.
SAMHSA/CBHSQ

SAMHDA: Overview, Availability and Access to Behavioral Health Data
The Substance Abuse and Mental Health Data Archive (SAMHDA) is an initiative of the Center for Behavioral Health Statistics and Quality (CBHSQ), Substance Abuse and Mental Health Services Administration (SAMHSA), U.S. Department of Health and Human Services (HHS). CBHSQ has primary responsibility for the collection, analysis, and dissemination of SAMHSA's mental health data. CBHSQ promotes the access and use of the nation’s substance abuse and mental health data through SAMHDA by providing public-use data files, file documentation, and access to restricted-use data files to support a better understanding of this critical area of public health.

The workshop provides an overview of national behavioral health surveillance systems maintained at and implemented by CBHSQ. The information and materials shared during the workshop also consists of a demonstration on the availability of recent behavioral health data through SAMHDA, a one-stop shop for SAMHSA public use data with online analysis and access to selected indicators on substance use and mental health disorders of national and sub-national importance.

The participants will learn about our surveys and acquire an understanding and knowledge about different types of data files, what data, publications (e.g., annual reports, spotlights) are available as free downloadable files, and what online analysis systems are available on the site to further their interest in research and dissemination.

Anatomage

Meet the Cadavers
The highly accurate anatomy available on the Anatomage Table is created by using real human cadavers. This introductory activity explores the pathology seen in both the Asian Female and Male cadavers. Because the anatomy comes from a real cadaver, everything seen on the Anatomage Table is life-sized. The cadavers are cut into 0.2mm slices and high resolution photographs are taken of each slice. Because the cadavers on the Anatomage Table are created using data from real people, each cadaver is unique and contains its own pathological data.

Abby Hess
Market Development Manager
Goodheart-Willcox Publisher

Explore Interactive Curriculum Built to Ignite Interest in HOSA
Take a tour of G-W Ignite, the new, easy-to-use online learning platform for foundational health science courses built to highlight opportunities for HOSA competitive events and guide students as they explore health science careers and practice hands-on skills. G-W Ignite incorporates pre/post assessments, HOSA event prep, videos, and a HOSA competitive events resource library where students can learn about HOSA competitions, practice a real-world scenario, take a practice test, and reflect on their experiences. Gain real-time data on which competitive events students are interested in, how they are doing against key learning outcomes aligned to national standards and remediate with a variety of practice activities. This session will include login access to a trial of G-W Ignite for health science, medical terminology, and anatomy & physiology courses, as well as the HOSA competitive events resource library.

| **Mya Shackleford**  
Manager, Student Recruitment  
American Physical Therapy Association |
| **PT Moves Me: Learn About Physical Therapy and Preparing for Success in Health Professions**  
Join us to learn more about the profession of physical therapy and preparing for college and graduate school admissions in general.  
During this workshop you will:  
1. Learn more about how to prepare to successfully achieve your health professions career goals (what you can do in high school, college, and graduate school).  
2. Have an opportunity to experience hands-on physical therapy activities to learn how physical therapists and physical therapist assistants treat patients to help improve movement.  
3. Get a glimpse into the physical therapy centralized application service (PTCAS) and understand the graduate admissions process. |

| **Courtney Esparza**  
Public Health Advisor, Youth Engagement  
SAMHSA |
| **Fentanyl and Youth: What You Need to Know**  
The Center for Disease Control reports that, fentanyl and other synthetic opioids are the most common drugs involved in overdose deaths. Over 150 people die every day from overdoses related to synthetic opioids like fentanyl and youth are disproportionately being impacted. You will learn what fentanyl is and why it is so deadly. You will learn what fake pills are and how young people are ingesting and dying of fentanyl poisoning, without even knowing they were taking it. You will learn about a variety of approaches schools and communities are taking to educate young people on the risks of fentanyl. You will learn how to recognize signs of an overdose and what to do. You will also learn about other strategies that you can use to protect yourself, your friends, your students, and your family. |

| **Cameron Ricks, MD**  
Founder & CEO  
SimRated Corporation |
| **Basic Airway Management - A Lifesaving Skill**  
This workshop will review the anatomy of the airway, techniques for creating and maintaining a patent airway and how to use airway adjuncts. These topics will align with the topic covered in SimRated Basic Airway Management curriculum. This course is designed for both teacher who would like to train their student and interested students. Hands on equipment and supplies will be covered. |

| **Elizabeth Johnson**  
Director of Recruitment for ADEA Application Services  
American Dental Education Association (ADEA GoDental) |
| **There’s Never Been a Better Time to Consider a Dental Professions Career!**  
Dental professionals do all sorts of things like work with patients, help people feel better and use their artistic skills, all while having a flexible lifestyle and earning a competitive salary! It’s not too good to be true — hear from current professionals and ADEA staff on why the dental professions might be a great career choice for you! |

Thursday - 10:00 AM Continues…
### Day in the life of an Army Healthcare Professional

**Kellie Stark**  
Education & Outreach Program Manager  
Army Healthcare Recruiting

Do you have what it takes to become a U.S. Army Physician?

Army Healthcare Professionals will discuss their expertise and Army story and provide information about Army Healthcare Education Programs and Incentives.

Whether you choose to serve as an Active duty or Army Reserve Soldier, we encourage those interested in becoming a health care physician, surgeon, nurse, veterinarian, dentist or specializing in any medical field to expand their horizons and pursue their career goals through professional growth, scholarships and many continuing education programs. The Army’s Health Professions Scholarship Program (HPSP) provides one- to four-year scholarships covering your full tuition at an accredited college or university of your choice, a monthly stipend of more than $2,500, required fees for medical school and reimbursement for other allowable expenses. Qualified graduate school students are also eligible to receive a $20,000 sign-on bonus. Come and learn how the US Army Medical Department can help fund your education so you can concentrate on being a successful health care professional without the debt.

### Starla’s Hands-On Body Systems: Central Nervous System...‘Get Connected!’

**Starla Ewan**  
Medical Science Instructor  
Starla’s Creative Teaching Tips

Participants will build the components of the Central Nervous System in order to show communication within itself, with the body, and how choice making influences life’s outcomes. Participants will take their new nervous system with them! (You will leave with more ‘brains’ and more ‘nerve’ for competition!!)

### Blood Diagnoses Disease.

**Susan Rajkovich, AMT Marketing and Communications Director**  
**Andrea Fields, Health Professions - Collin College**  
**Miranda Lankford, Clinical Coordinator, Health Professions - Collin College**  
**Leon Deutsch, Medical Assisting Director - Collin College**  
**Michelle Kelly, Professor, Health Professions - Collin College**  
**Michelle Redding, Adjunct Faculty, Collin College**  
**Bio-Rad Laboratories**

**Come, Take a Stab in a Phlebotomy Arm!**

Do you enjoy clues and solving mysteries? If so, you may enjoy helping physicians diagnose disease and illness by collecting blood specimens and becoming a certified phlebotomist. Learn about phlebotomy, the role of a phlebotomist, and how a professional phlebotomy certification can be a rewarding career in this interactive and informative presentation. Come join us and take a stab in our phlebotomy training arm, test your knowledge with our interactive quiz and more!

### US Army Medic

**John Turks**  
Education Services Specialist  
US Army Recruiting Battalion Dallas

The presentation will cover enlistment opportunities within the medical field and as well as the amount of education involved.

### Competitive Event in Biotechnology: Planning, Practice, and Q&A

**Leigh Brown**  
Curriculum & Training Specialist  
**Tamica Stubbs**  
Curriculum & Training Specialist  
**Bio-Rad Laboratories**

Biotechnology encompasses the science behind medicine: the tools and techniques used in medical research and in the development of diagnostics, therapeutics, vaccines, and more. The Competitive Event in Biotechnology encourages HOSA members to explore careers in biotechnology and understand how biotechnology will impact the future of medicine. In this workshop, we will describe the elements of the competitive event, the resources available to help prepare for competition, and tips for success.
### Thursday – 11:00 AM

#### USPHS World Premiere — *Invisible Corps*
HOSA-Future Health Professionals has been selected to host the second world premiere of the PBS documentary, “Invisible Corps”, which highlights the role of those serving in the United States Public Health Service. Along with the premiere, there will be a USPHS panel for Q&A led by RADM Pam Schweitzer (ret), USPHS, Senior Strategy Consultant and former Assistant Surgeon General and 10th Chief Pharmacist Officer of the United States Public Health Service.

<tr>
<td>Matt Painter, (NP, RN, NR-P, CFRN)</td>
<td>Augusta Health</td>
<td><strong>What is Interventional Radiology?</strong></td>
<td>Interventional radiology or “IR” is not new but quickly becoming a great option to treat many patients. IR is the use of ultrasound, fluoroscopy, and CT-guided imaging to perform a procedure on a patient. Some examples are spinal blocks, therapeutic joint steroid injections, removal of clots from parts of the body to embolizing a tumor, and more. Many of these procedures would require major surgery if not for the IR option. In this workshop, we will review cases and the images that were used in the procedures to increase your knowledge of this field of work.</td>

<td><strong>Charting the Course with uBeats: A FREE Health Science Resource</strong></td>
<td>“Waves” continue to surge in all areas of health science. Current trends have created an increasing demand for passionate Health-Science professionals. We recognize this need and have created a FREE 6th-12th grade online health science, science, and STEM resource titled, uBeats. Our mission is to inspire and expose students to access pathways into health-science professions and the workforce. We will explore how students are “Charting their Course” through the UNMC and UNO Building Excellence in Academics Through Stem (uBeats) curriculum. We will discuss the need for the program (statewide and nationally), see examples of the uBeats modules and teacher guides, discuss the expected outcome for users, and share our collaboration with NCHSE for alignment to national health science standards. This session is for a “deep sea” dive into an online science curriculum-companion program like uBeats or those interested in building online science and healthcare learning modules.</td>
<td></td>
</tr>
<tr>

### Recreational Therapy: The Best Kept Secret in Allied Health

**Brent Wolfe**  
Executive Director  
American Therapeutic Recreation Association

This session will discuss the profession of recreational therapy. Specific attention will be paid to defining the field, identifying who recreational therapists work with, where recreational therapists work, and what they do to provide treatment to patients. Additionally, time will be dedicated to discussing skills a recreational therapist should possess and how those skills can be developed. The conversation will conclude with the requirements to practice as a recreational therapist.

### Personalize Learning with Savvas’ CTE Texas-Aligned Titles and Digital Platforms

**Christopher Derasmo**  
Curriculum Specialist,  
Math K-12 and CTE  
Savvas Learning Company

Savvas Learning Company is the official distributor for Pearson in offering effective, hands-on content in Career & Technical Education programs to K-12 schools and districts. This presentation will provide CTE teachers with a demonstration of the Pearson MyLab® digital student learning platform and how it integrates with multiple Learning Management Systems such as Canvas® and Schoology®. MyLab provides teachers with tools for monitoring students, differentiating instruction based on individual student needs, and providing opportunities for students to engage with the new Health Science TEKS-aligned program content. Programs Areas of Focus Include: Health Science Theory, Anatomy, Physiology, and Disease, Medical Terminology, and Forensic Science. Teachers will experience a deep dive into looking at how each title fully covers the TEKS, and which certifications students will be prepared for upon completion of their courses. Savvas Learning Company will be presenting the key features of these Pearson programs for Health Sciences courses and pathways for certification and how they meet the needs of Texas students and educators.

### Live Diagnosis of a Patient in The Developing World

**Marshall Bailly**  
Executive Director  
Leadership Initiatives

Leadership Initiatives holds two Medical Internships, one focusing on public health in the developing world and the second on neuroscience, every summer in conjunction with Georgetown University. During this workshop, HOSA students will experience an in-time real-life diagnosis of a patient in our partnered hospital in Bauchi State, Nigeria. This unique opportunity is made possible for every student of our Advanced Medical & Public Health Internship during the summer. Students will also learn about the Advanced Medical Neuroscience Internship as well.

### Starla's Hands-On Body Systems: Brain Trauma, Tumors, and Strokes

**Starla Ewan**  
Medical Science Instructor  
Starla’s Creative Teaching Tips

Participants will build the autopsy slices of the brain and construct the change of structure created by brain trauma such as concussions and CTE, Tumors, and Stokes. This workshop makes hard content of pathological changes in the brain easy to understand and apply to case studies. Everyone takes home their clay autopsy brain slices!

Becoming Unbreakable
Uncertainty is unavoidable. Many times we are unsure about where we stand academically, socially, and personally. We are often simultaneously apprehensive of both our present and future. As a result, anxiety and depression are two of the most common issues that arise.

Studies show that the ability to manage stress and deal positively with adversity is key to building resilience and confidence. Students don’t know that there are opportunities in daily life to prove that they have the resilience and confidence they need to overcome and rise above anything. Be inspired to realize there are tools that can be used to create confidence, build resilience and become unbreakable.

This session will include storytelling and experiences from the speaker’s nationally known policing background to help you believe you can wake up every day with high self-esteem, develop the ability to bounce back from disappointment and failure, and gain an understanding of how to find their personal purpose, aka their “why”. You will leave empowered!

Career Connected Education: Health Information Careers, Microcredentials and Certification Pathways
This session introduces an interactive career map tool that identifies career roles in Health Information, associated credentials, and workforce demand. Participants will learn about various job roles and career pathways in health information, as well as industry recognized stackable micro credentials and certifications. Faculty and advisors will learn about career exploration tools, student-based activities, and resources for supporting student planning for future roles in health information.

Participants will be able to define the purpose of health information across the healthcare ecosystem.

Participants will be able to identify job roles in health information and their related industry credentials.

Participants will be equipped with tools to assist students in exploration and planning activities related to health information careers.

Participants will be able to recognize course alignment and articulation opportunities with post-secondary institutions.

Top 10 Instructor Tips to Prepare Future Medical Assistants
In April 2022, 44% of medical practices noted that medical assistants (MAs) were the most difficult position for them to recruit in a poll completed by the Medical Group Management Association (MGMA). Industry leaders are citing several factors for these difficulties, including stressors from the pandemic and candidates lacking don't have the requisite training.

Since 2013 NHA and Career Technical Education Instructors have been educating and certifying Medical Administrative (CMAA) and Clinical Medical Assistants (CCMA) through robust programs. In this session, we will review updates to the new exams, talk through best practices, review innovative tools and tips from the most successful programs.

Students don't know that there are opportunities in daily life to prove that they have the resilience and confidence they need to overcome and rise above anything. Be inspired to realize there are tools that can be used to create confidence, build resilience and become unbreakable. This session will include storytelling and experiences from the speaker's nationally known policing background to help you believe you can wake up every day with high self-esteem, develop the ability to bounce back from disappointment and failure, and gain an understanding of how to find their personal purpose, aka their “why”. You will leave empowered!</td>

This is Public Health: Ways you can get involved now to build skills, experience, and your network to improve equity and increase health literacy

Healthcare in the United States is changing rapidly and so are the opportunities to apply your skills to improve healthcare. Public health is the science of protecting and improving the health of people and their communities. This work is achieved by promoting healthy lifestyles, researching disease and injury prevention, and detecting, preventing and responding to infectious diseases. Companies of all types like Kaiser, MD Anderson, Walmart, Boeing, the Veterans Administration, and Centers for Medicare and Medicaid Innovation are hiring people with training in public health to perform roles in policy and advocacy, healthcare marketing and communication, analytics and finance, and in consumer engagement and new product development.

This session will explore opportunities to engage in internships and other activities to gain and develop skills in the key areas of public health: healthcare management and policy, health education and health promotion, epidemiology and biostatistics, global and environmental health. Partner organizations featured will include: The Coalition to Transform Advanced Care; Help Texts; Archangels.

Health Science Education Product Manager
Realityworks

Starting a New Sports Medicine Pathway Program

According to the Bureau of Labor statistics, the career prospects in athletic training are huge! So now is the time to get a Sports Medicine Pathway Program up and running at your school. Get tips for building your program, organizing content, and ensuring program alignment. We’ll even have some suggestions for teaching tools and free resources to help you along the way.

Matt Painter, NP, RN, NR-P, CFRN
Augusta Health

You Diagnose the Case

Case studies are a great way to learn. Yes, all those “facts” you are learning are useful. This workshop will present 3 real cases with the symptoms and diagnostics (labs, imaging etc.) used to arrive at the final diagnosis in a step-by-step fashion. After “diagnosing” the case, pathophysiology and treatment will be reviewed. We will use a popular game show format to work through each case.

Charting the Course with uBEATS: A FREE Health Science Resource

“Waves” continue to surge in all areas of health science. Current trends have created an increasing demand for passionate Health-Science professionals. We recognize this need and have created a FREE 6th-12th grade online health science, science, and STEM resource titled, uBeats. Our mission is to inspire and expose students to access pathways into health-science professions and the workforce. We will explore how students are “Charting their Course” through the UNMC and UNO Building Excellence in Academics Through Stem (uBeats) curriculum. We will discuss the need for the program (statewide and nationally), see examples of the uBeats modules and teacher guides, discuss the expected outcome for users, and share our collaboration with NCHSE for alignment to national health science standards. This session is for a “deep sea” dive into an online science curriculum-companion program like uBeats or those interested in building online science and healthcare learning modules.

Top 25 Health Careers in 2023!
Created by the National Consortium for Health Science Education (NCHSE), “Top 25 Health Careers in 2023” provides attendees with materials to highlight rewarding healthcare career choices. Resources include free posters as well as websites and information on the education requirements, salaries, and employment outlook for a wide variety of health careers. Let’s impact the healthcare workforce shortages and build awareness by reaching students early. This session is designed to equip teachers to encourage students to consider health science pathways. What a powerful opportunity; providing guidance to students about their future careers and possibly the next generation of health professionals! Learn how NCHSE supports health science education programs to effectively prepare students to become the next generation of health professionals.

Be The Match

Be The Match and You
When mission-driven organizations like HOSA and Be The Match partner together with a common purpose, magic happens—and anything is possible. This fun and interactive session will help you understand how Be The Match saves lives through cellular therapy, why matching blood stem cells is not the same as matching blood type, and what diseases can be treated by a blood stem cell transplant. You’ll also learn the steps to host your own swabbing event in your community and how to optimize your chapter’s fundraising. Everyone can help save more lives—regardless of location or age.
HOSA would like to say a special thank you to our financial and in-kind sponsors. Please be sure to thank them for their valuable support.

### Personalize Learning with Texas-Aligned CTE Titles and Digital Platforms from Pearson

**Christopher Derasmo**  
Curriculum Specialist, Math K-12 and CTE  
Savvas Learning Company

Savvas Learning Company is the official distributor for Pearson in offering effective, hands-on content in Career & Technical Education programs to K-12 schools and districts. This presentation will provide CTE teachers with a demonstration of the Pearson MyLab® digital student learning platform and how it integrates with multiple Learning Management Systems such as Canvas® and Schoology®. MyLab provides teachers with tools for monitoring students, differentiating instruction based on individual student needs, and providing opportunities for students to engage with the new Health Science TEKS-aligned program content. Programs Areas of Focus Include: Health Science Theory, Anatomy, Physiology, and Disease, Medical Terminology, and Forensic Science. Teachers will experience a deep dive into looking at how each title fully covers the TEKS, and which certifications students will be prepared for upon completion of their courses. Savvas Learning Company will be presenting the key features of these Pearson programs for Health Sciences courses and pathways for certification and how they meet the needs of Texas students and educators.

### Precision Medicine & Health: Proactive & Personalized Care to Predict, Prevent, and Cure Disease

**Cassity Gutierrez**  
Chair & Professor of Health Sciences  
Drake University

You’ve likely heard of precision medicine which helps doctors find unique disease risks and individualized treatments; precision health is broader! Genes, behaviors (such as exercise and eating habits), and environment are all factors that affect health. The goal of precision health is to protect health by measuring these factors and acting on them; interventions can be tailored to individuals, rather than using the same approach for everyone. This session will provide an overview of precision medicine and precision health, the future of disease prevention & control, to include examples of current implementation in the United States.

### Workshop in a Box – Learn How to Suture

**David Green**  
Director, Office of Career Promotion  
American Association of Colleges of Podiatric Medicine

AACPM’s Workshop in a Box is a highly interactive “hands-on-workshop” designed to provide students interested in health sciences with the opportunity to learn suture and wrapping techniques.

Participants will learn from about learning suturing, taping and more to have learn the skills to perform suturing techniques in health careers. Our DPM will provide students with the necessary skills to begin suturing as well as provide compelling personal insights on why being a DPM is an amazing career to choose!

### Explore Healthcare Careers Using Virtual Reality

**Arielle Woodmore**  
Business Development Manager, Health Sciences  
Transfr

Do you want to work in healthcare but are unsure which role best fits you? Are you aware of the healthcare occupations that are available within your community? Would you like to explore various healthcare careers before choosing a pathway? New research suggests that virtual reality (VR) enhances the training of future health professionals, offering practical experience beyond the walls of healthcare facilities. With VR, you can immerse yourself in multiple healthcare roles while finding the perfect fit. Join us to learn how virtual reality can help students decide which healthcare occupation will best fit them.

Healthcare Workforce in Texas

The session will provide detailed data on the growth of healthcare workforce needs in the state of Texas. Participants will develop techniques on ways to connect with their local Healthcare partners to create successful pathways that provide opportunities for students and the community.

This is Public Health: Ways you can get involved now to build skills, experience, and your network to improve equity and increase health literacy

Healthcare in the United States is changing rapidly and so are the opportunities to apply your skills to improve healthcare. Public health is the science of protecting and improving the health of people and their communities. This work is achieved by promoting healthy lifestyles, researching disease and injury prevention, and detecting, preventing and responding to infectious diseases. Companies of all types like Kaiser, MD Anderson, Walmart, Boeing, the Veterans Administration, and Centers for Medicare and Medicaid Innovation are hiring people with training in public health to perform roles in policy and advocacy, healthcare marketing and communication, analytics and finance, and in consumer engagement and new product development.

This session will explore opportunities to engage in internships and other activities to gain and develop skills in the key areas of public health: healthcare management and policy, health education and health promotion, epidemiology and biostatistics, global and environmental health. Partner organizations featured will include: The Coalition to Transform Advanced Care; Help Texts; Archangels.

VetMed Pathways – A Million Ways to Care

If you love animals, math, and science, then consider a career in Veterinary Medicine. A degree in Veterinary Medicine opens up a lifetime of exciting and dynamic work. No day is ever the same. Vet Med careers span many industries and environments, from the beloved neighborhood Vet to a researcher doing important work to protect our food supply. There are endless ways to care for animals and our planet. Learn about the various career options and paths to veterinary school.

Health Science Team Trivia

This FUN and EXCITING workshop is for HOSA members and advisors.

When it comes to trivia questions, the possibilities are endless, which is why trivia nights are becoming incredibly popular across the country. Anyone and everyone can play trivia. Experts say playing trivia games can provide a dopamine rush much like gambling, without the negative effects. HOSA members and advisors will enjoy the thrill of providing correct answers to questions about lesser-known health science facts.

Teams of 6 or fewer participants will answer 20 health science trivia questions. Single players will be encouraged to join a team, and of course, there will be prizes for the winning team. Join us for health science trivia fun at the ILC!
### Cameron Ricks, MD
**Founder & CEO** SimRated Corporation

**Training Foundational Skills in Healthcare— Crisis Resource Management**

This course will review Crisis Resource Management (CRM) and how to implement its simulation-based training in the classroom. This course is designed for teachers however could be applicable to students. Crisis Resource Management refers to a set of principles dealing with cognitive and interpersonal behaviors that contribute to optimal team performance in healthcare. Skills which will be reviewed include leadership, situational awareness, communication and resource allocation. Simulation provides an opportunity for students to practice these skills in the classroom. Rapid sequence deliberate practice is the simulation technique that will be reviewed for CRM classroom implementation. This course will use Naloxone for opioid overdose as a simulation scenario to demonstrate these skills.

**Discover Everything you need to know about Audiology and Speech-language Pathology Careers**

Are you looking for a versatile and highly rewarding career? Do you want to change lives? Are you interested in a profession that can improve people's educational outcomes, social bonds, family relationships, and career trajectories? The careers of audiology and speech-language pathology are calling for you!

Humans are born with a need to communicate, and that need stays with us throughout our lives. This hands-on workshop will immerse you in the types of encounters audiologists and speech-language pathologists face when giving the gift of communication to people at different stages in life. You'll have an opportunity to learn how we manage speech and hearing disorders across the lifespan. We will also share things we wish we would have known about Communication Sciences and Disorders before joining the professions.

### David Kelly, M.D.
**Past HOSA International President** Rutgers-New Jersey Medical School Dept of Ophthalmology & Visual Science Resident, PGY3

**How to Get into Medical School**

Medicine remains one of the most competitive career paths in the U.S., and many students are surprised to find that success in admission can be dependent on choices made years earlier. We will cover what to focus on in both high school and college by discussing schools, majors, GPAs, extracurriculars, the MCAT, interviews, and more.
Friday – 10:00 AM

Wendy Scripps

So, you want to go to dental school...  
This workshop reviews how to be a competitive applicant to graduate and professional schools. There will be tips and tricks for preparing early to boost your application.

Srilakshmi Venkatesan  
Hopkinton HOSA

The Systemic Institutionalized Inequities in Neurological Care  
Driven by an increase in neuroscience research and clinical advancement, the pursuit of psychology, cognitive science, behavioral sciences, and neuroscience has tremendously increased over the past decades. Yet the socioeconomic inequalities between high-and-low-income individuals have only continued to grow. In this workshop, we will explore the various advancements in neuroscience research but reflect on the systemic discrimination and institutionalized prejudice that have plagued the care of individuals. Beginning with an introduction to these topics, the workshop will include interactive activities and an informal debate to understand the rising challenges in healthcare and neuroscience. Then, we will discuss the innovations, research, and opportunities to better the systems of healthcare. Throughout the presentation, case studies will also be examined to understand the incentives and reasons as to how the practices have become institutionalized and how we can work to lessen the socioeconomic gaps in healthcare.

Christi Lower, PhD, CAE, RHIA, FAHIMA  
Director of Academic Strategy & Workforce Development  
American Health Information Management Association (AHIMA)

Career Connected Education: Health Information Careers, Microcredentials and Certification Pathways  
This session introduces an interactive career map tool that identifies career roles in Health Information, associated credentials, and workforce demand. Participants will learn about various job roles and career pathways in health information, as well as industry recognized stackable micro credentials and certifications. Faculty and advisors will learn about career exploration tools, student-based activities, and resources for supporting student planning for future roles in health information.

• Participants will be able to define the purpose of health information across the healthcare ecosystem.
• Participants will be able to identify job roles in health information and their related industry credentials.
• Participants will be equipped with tools to assist students in exploration and planning activities related to health information careers.
• Participants will be able to recognize course alignment and articulation opportunities with post-secondary institutions.

Charity Ballmann  
Manager of Intern Onboarding & Retention  
HCA - Medical City Healthcare

Did I say that?!: Professional Communication Etiquette  
Technology is a critical component to many of our successes, but trends have emerged demonstrating that our reliance on technology may have stunted our ability to effectively communicate in a professional setting. The goal of our workshop is to provide communication trends within a professional setting, tactics to improve communication across generations at work, and provide hands-on case studies as a fun and interactive way to make sure we minimize the occasions where you have to say, "Did I say that"? in a professional setting.

<td>Senior Vice President, Chief Information Officer, Christus Health</td>
<td>ReDesigning Healthcare: THINK DIFFERENTLY. Nothing prompts evolution more than the threat of extinction. And healthcare must evolve quickly. As an industry, our traditional operating and clinical models are built around the convenience of the providers of services, not the consumers of services. In today’s digital, mobile and ever-connected world, we must Think Differently in order to deliver a modern healthcare experience when, where and how it is most convenient for those we exist to serve. To ReDesign Healthcare, we must Think Differently.</td>

<tr>
<td>Sunitha Konatham</td>
<td>Identifying &amp; Responding to Human Trafficking in a Clinical Setting</td>
<td>UnboundNow Austin is a local anti-human trafficking non-profit activated to prevent trafficking. Identify victims, and serve survivors that serves the Greater Austin area. This presentation, &quot;Identifying &amp; Responding to Human Trafficking in a Clinical Setting&quot; teaches professionals about risk factors and warning signs of human trafficking, and how to respond to victims in a trauma-informed way. The training teaches members of our community about the realities of human trafficking, how to identify risk factors, and resources for helping potential victims they may know.</td>
</tr>
<tr>
<td>Luz Rivera</td>
<td>All Health Professionals Important Role in Ending a National Epidemic</td>
<td>Discuss a current national initiative to end with an epidemic and the important role that every health professional has in ending this national and global epidemic. Participant will be able to participate in a tabletop exercise to plan a potential response.</td>
</tr>
<tr>
<td>Erik Werner</td>
<td>Gain Real-World Medical Skills through Virtual and Volunteer Abroad Clinical Opportunities</td>
<td>In this workshop, participants will interact in a live Zoom session with our medical team in Honduras, traveling in real-time to visit our urban and rural clinics in Honduras. Participate in live telediagnostic consultations and learn and experience how we implement rural healthcare clinics. Learn how a virtual service-learning and/or volunteer abroad program can be implemented at your school or club to make real-world impact and provide valuable healthcare skills and experiences for students.</td>
</tr>
<tr>
<td>Brigadier General Michael Pyle</td>
<td>Explore Army Reserve Medicine: Double Your Opportunities and Impact</td>
<td>An Army Reserve healthcare career means you can train and serve part-time while pursuing a civilian career or further education. This workshop, led by Brigadier General Michael Pyle, will explore the opportunities and benefits of Army Reserve service in addition to civilian practice – like working with professionals from diverse disciplines and backgrounds, access to the latest technology, flexible scheduling, and more. BG Pyle will speak about his duty as Deputy Commanding General of the Army Reserve 807th Medical Command, why he continues to serve, and opportunities for future healthcare professionals.</td>
</tr>
<tr>
<td>Starla Ewan</td>
<td>Starla's How do you Thrive, Not Just Survive?</td>
<td>Great study tricks to help you learn ANY subject faster and be successful in less time! Learn to ‘see’ the traps before they slow you down or derail you from your goals! Enjoy this fun session for pumping up your success level in your life and future...especially in college</td>
</tr>
<tr>
<td>Tiffany Montgomery</td>
<td>Women's Health Nursing: More than Catching Babies</td>
<td>This workshop will provide an overview of career options for those interested in women's health nursing professions. Attendees will learn about career pathways for labor &amp; delivery, mother-baby, and NICU nurses, as well as certified nurse midwives, nurse anesthetists, and women's health clinical nurse specialists and nurse practitioners. Discussion topics will include traditional and non-traditional paths to nursing, advanced clinical nursing education (master's level), women's health certification options, and doctoral nursing education.</td>

Top 10 Instructor Tips to Prepare Future Medical Assistants

In April 2022, 44% of medical practices noted that medical assistants (MA’s) were the most difficult position for them to recruit in a poll completed by the Medical Group Management Association (MGMA). Industry leaders are citing several factors for these difficulties, including stressors from the pandemic and candidates lacking the requisite training.

Since 2013 NHA and Career Technical Education Instructors have been educating and certifying Medical Administrative (CMAA) and Clinical Medical Assistants (CCMA) through robust programs. In this session, we will review updates to the new exams, talk through best practices, review innovative tools and tips from the most successful programs.

Nuero 101

The brain functions as an important regulatory organ. The various lobes and regions of the brain are responsible for interpreting sensations, creating memories, and controlling or influencing body function. Participants will use modeling clay and MANIKEN® models to build the anatomy of the brain, spinal cord, and nerves. Find new ways of teaching directional terminology, while reflecting on why all body systems are interconnected in form and function.

One Health Workshop

One Health is the connection between public health and the health of the environment, plants, and animals. With this highly interactive workshop, the participants first learn where One Health fits into everyday life and touches upon every health discipline; later, they create actionable items to bring home that improve the health of those in their school and community. Lastly, participants will have the opportunity to connect with schools (found across the world) that are also supportive of teaching about One Health. Together, through partnerships, students can participate in global contests. More details at the workshop.

Fentanyl and Youth: What You Need to Know  
The Center for Disease Control reports that, fentanyl and other synthetic opioids are the most common drugs involved in overdose deaths. Over 150 people die every day from overdoses related to synthetic opioids like fentanyl and youth are disproportionately being impacted. You will learn what fentanyl is and why it is so deadly. You will learn what fake pills are and how young people are ingesting and dying of fentanyl poisoning, without even knowing they were taking it. You will learn about a variety of approaches schools and communities are taking to educate young people on the risks of fentanyl. You will learn how to recognize signs of an overdose and what to do. You will also learn about other strategies that you can use to protect yourself, your friends, your students, and your family.

Resilience in Healthcare
Healthcare is emotionally challenging, to say the least. Burnout, depression, PTSD, anxiety, sadness, and fatigue are common verbiage used by new and seasoned healthcare providers alike. We teach how to give medications, start IVs, use diagnostics, and more, but what about how to “deal” with difficult patients, situations, and stress? Whether you are a seasoned healthcare worker or an aspiring one this workshop will help build some resilience to run the marathon of healthcare.

HOSA Competitive Event Preview
Members of the HOSA Competitive Events staff will preview what to expect in 2023-2024 for the HOSA Competitive Events Program.
CONTINUING EDUCATION UNITS OFFERED AT HOSA’S ILC

HOSA offers Continuing Education Units (CEUs) for educators. If you are interested in receiving credit, please go to hosa.org/ceu to download a CEU information packet and get started.

- CEU certificates will be awarded by HOSA-Future Health Professionals. Chapter advisors should check with their local school administration or state advisor to determine if these CEUs are recognized for meeting state teaching licensure requirements.
- The CEUs offered are “education” CEUs, not “nursing” CEUs.
- The CEU certificate indicates 10 hours = 1 CEU. If your school measures units by the hour, the certificate will show the hours.
- Advisors must complete 10 hours of staff development to earn one CEU or 20 hours to earn two CEUs. A maximum of 20 hours or two CEUs will be awarded per person; partial credit or hours will not be awarded.

You will be able to choose from the following options:

A. Preparation of HOSA Members for ILC, Conference Registration, HOSA Advisor Networking and Opening Session
   Varies 5 hours

B. Competitive Event Management
   Varies 5 hours

C. Advisor Sessions:
   - Local and State Advisor Orientation
     Wednesday 1 hour
   - New Advisor Coffee Talk (for new advisors only)
     Wednesday 1 hour

D. Educational Symposiaums
   Varies 1–6 hours
   Multiple workshops are offered. To earn the 1-3 hours for this activity, advisors must attend one, two, or three Educational Symposium workshops.

E. Special Sessions:
   - Business Session
     Friday 2 hours
   - Recognition Session
     Friday 2 hours
   Must attend both sessions in order to earn the hours.

F. Advisor Support
   Varies 1–8 hours
   Advisors may participate in Courtesy Corps at one of the following events: General Sessions, Special Activity on Friday night or Dance on Saturday night.

G. Goodheart-Willcox Advisor Leadership University 401 New Advisor or 501 Advanced Advisor
   Friday 4 hours

H. HOSA Expo
   Varies 1–3 hours
   Multiple exhibits are part of HOSA’s expo. To earn hours for this activity advisors must visit 5, 10 or 15 exhibitors.

Advisor Staff Development Objectives

Completion of specific learning objectives will result in earned contact hours. Upon completion of the stated objectives and evaluation forms, the advisor will be awarded a certificate of credit before leaving the conference.

Objectives for HOSA staff development opportunities at the ILC are:
- Apply rules and procedures for ILC registration.
- Prepare HOSA members for all aspects of conference involvement.
- Network with HOSA Advisors from other schools and states.
- Participate in the HOSA ILC Opening Session.
- Discuss products and services with professionals at the HOSA Exposition.
- Discuss rules and procedures for a specific competitive event.
- Analyze roles and responsibilities of the competitor, judge, and event personnel.
- Carry out duties of the event manager or section leader for an assigned event.
- Evaluate a competitive event in regard to processes, results, and competitor reaction.
- Identify management structure and adult leaders of HOSA.
- Analyze conference activities and opportunities for HOSA members and advisors.
- Discuss roles and responsibilities of the chapter advisor at the ILC.
- Attend and actively participate in two educational symposium workshops.
- Analyze conference rules.
- Discuss pros and cons of new business items.
- Evaluate candidate speeches.
- Analyze role of the Executive Council in the implementation of the Recognition Session.
- Evaluate HOSA services recognized at the international level through the Recognition Session.
- Identify recognition opportunities for HOSA members through Recognition Category events.
- Evaluate results of the HOSA International Executive Council Election process.
- Review guidelines of the event you are selected to judge.
- Evaluate ILC strengths and weaknesses and provide feedback to HOSA Management, thereby developing an understanding of why certain processes are in place, and provide suggestions for improvement.
- Develop a plan to manage a HOSA chapter as an integral part of the health science curriculum.
Build Healthcare Classroom-to-Career Pathways for Your Students

Transfr is building career pathways for millions of future healthcare professionals through hands-on training using immersive technologies. Our simulations provide learners with the healthcare skills they need to secure a job that offers upward mobility and a better quality of life.

From hands-on training simulations to healthcare jobs
A student’s journey

1. Master training simulations
Once they choose a healthcare career, students can get hands-on simulation training in a high school CTE course.

2. Experience healthcare careers
A student takes a virtual tour of healthcare occupations. Give your students hands-on experience with healthcare careers to help them choose the path that’s right for them.

3. Earn and learn
Students then move on to college to become experts in their chosen healthcare role and get on-the-job learning experience.

4. Join the workforce
Skilled workers enter the healthcare workforce with well-paying salaries, the potential for tuition reimbursement, and more.

“I think Transfr has probably some the best medical VR training sims — and I taught medics for eight years! That quality is going to make a huge difference in the gap between classroom learning and practical.”

— Keith Fletcher
Executive Director
Strengthening Community Colleges Grant
Technical College System of Georgia

Empower Students with VR Health Sciences Simulations from Transfr

- VR career exploration gives students a firsthand look at healthcare careers
- Use VR healthcare skills training to give students a safe way to build competence and confidence in high-demand fields

HOSA’s dress code policy has different areas of emphasis: general session dress; competitive events dress; and official function dress (workshops, HOSA expo and social activities). Refer to our poster for a visual dress code at hosa.org/appendices.

**General Session Dress (REQUIRED):**

**Official HOSA Uniform Policy:**
- Tailored navy blazer with emblem affixed over the heart
- Matching navy slacks or navy knee-length skirt
- White, closed-neck, tailored dress shirt suitable for tie or scarf
- Accents: maroon HOSA scarf or maroon long tie
- Closed-toe blue or black shoes (hose optional)
- Belt (blue or black)
- Head covers that are required for religious purposes or to honor cultural tradition are allowed

**Non-uniform Alternative:**
- Black or navy blue suit
- White, closed-neck, tailored dress shirt suitable for tie or scarf
- White blouse (can be member’s choice)
- Accents: maroon or navy long tie
- Members may choose to wear knee-length skirt or slacks
- Closed-toe blue or black shoes (hose optional)
- Belt (blue or black)
- Head covers for religious purposes or to honor cultural tradition are allowed

**Competitive Events Dress Attire:**
Delegates must adhere to the policy as specified in the individual competitive event guidelines for the orientation and event in which they are competing. If the competitive event guidelines identify business attire as appropriate, competitors can either wear the official HOSA uniform or any of the following dress is acceptable (color is not specified for clothing or shoes for competition):
- Suit
- Shirts
- Sports Jackets
- Pants
- Skirts
- Dresses
- Jackets
- Shoes (closed- or open-toe heeled sandals)

**Clinical or Occupational Attire:**
- Scrubs, EMS attire, CERT attire
- Khaki pants with polo top
- Clinical or tennis shoes
- Shorts and flip-flops are not acceptable HOSA clinical attire.

**Process for Awarding Competitive Event Dress Bonus Points:**
- For all competitive events, five (5) bonus points will be added in Tabulations once per competitor and/or team for appropriate dress. In team events, all team members must be properly dressed to receive the bonus points. Exceptions are as noted in the event guidelines.
- At the ILC, dress bonus points are awarded unless a dress violation is agreed upon by the Event Manager and a member of the HOSA CE staff. The Event Manager must notify the Event Lieutenant or Category Chair. When dress points are not awarded, this must be indicated on the HOSA Event Section Summary form, and signed by a member of the CE Program staff.
- Judges are NOT responsible for the awarding of dress bonus points; this is handled by competitive event personnel.

**Competitive Events Dress Tips:**
No policy can possibly cover all contingencies so HOSA members must use a certain amount of judgment in their choice of clothing to wear for HOSA competition. HOSA members who experience uncertainty about acceptable HOSA attire should ask his/her HOSA local or state advisor.

**Note about HOSA’s Policy:**
Head covers for religious purposes or to honor cultural tradition are allowed. Competitors should dress appropriately, based on the dress standards outlined for the gender to which they identify.

**Official Function Dress (Workshops, HOSA Expo and Social Activities):**
Appropriate business attire is required for official functions including the HOSA Expo and workshops in conjunction with the ILC. Social activities dress code will include everything EXCEPT: athletic clothing, swim wear, sheer or mesh clothing, tank tops, muscle shirts, crop tops and clothing with obscene or suggestive printing. Shirt straps must be two inches wide and the length of shorts and skirts must be at minimum to the fingertip.
HOSA ILC CODE OF CONDUCT

A good reputation enables members to take pride in their organization. HOSA members have an excellent reputation. Your conduct at any HOSA function should make a positive contribution to the reputation already established.

1. Your behavior at all times should be such that it reflects credit to you, your school/college, your state/country and HOSA. Members shall refrain from using inappropriate or profane language at all times. Members shall refrain from verbal, physical or sexual harassment, hazing or name-calling.

2. Members conduct is the responsibility of the local chapter advisor or chaperone. Members shall keep their advisors informed of their activities and whereabouts at all times.

3. HOSA Conference name badges shall be worn at all times at HOSA functions. You are expected to attend all general sessions and other scheduled conference activities. Please be prompt and show respect to those in the audience and on stage.

4. Members are to report any accidents, injuries or illnesses to their local chapter or state advisor immediately.

5. Members are expected to observe the designated curfew. (Curfew means that each person must be in their room by the designated hour.)

6. If a member is responsible for stealing or vandalism, the member and his/her parents will be expected to pay any and all damages.

7. Members/participants attending the International Leadership Conference may not purchase, consume or be under the influence of alcohol or drugs at any time. Violators will be subject to stringent disciplinary action.

8. The International Leadership Conference is a non-smoking conference.

9. Members who disregard the rules will be subject to disciplinary action and will be sent home at their own expense. Parents will be notified.

10. Any long distance phone calls, charges to the room, etc. will be the responsibility of the individual member and/or parents.

11. Members are to abide by the ILC Attire Policy at all business sessions, general sessions, competitive events and other conference activities.

12. As a delegate to the International Leadership Conference, permission is granted to make photographs, videotapes, broadcasts, and/or sound recordings, separately or in combination, available for reproduction for educational and promotional purposes by HOSA, Inc.

13. For Competitive Events — All work must be your own, created and completed by you alone (or with your event team). Plagiarism, copyright violation, cheating, and falsification of information are prohibited. Any attempt to gain an unfair advantage will not be tolerated. Any time outside sources are used for a project, the required Reference page (as listed in applicable event guidelines) must be completed. Competitors at ILC understand and agree to abide by the HOSA Honor Code.

GENERAL SESSION PROTOCOL: The general sessions should be enthusiastic but delegates must not be rude or obnoxious to those in the audience or on stage. It is important to remain seated until the end of the session. States that do not adhere to general session protocol will be asked to send a representative to a special meeting of the HOSA Executive Council.

Please occupy ALL seats at the Opening Session. Leave no empty seats as this means other HOSA members will not be able to enjoy the Opening Session. Your cooperation is appreciated and essential due to limited seating.

You’re Invited

4:00–5:00 PM
TRINITY BALLROOM 4 & 5
THURSDAY June 22

Please join us... and other State and local HOSA Advisors and members to the National Technical Honor Society Reception!

This event is for HOSA advisors to foster networking, conversation, and learning about a variety of topics, and your chapter does not have to be a NTHS member to attend. We want you to meet HOSA’s newest Honorary Life Member, Peyton Holland, as we welcome him to HOSA-Future Health Professionals.

Visit bio-rad.com/HOSA to learn more about the HOSA Competitive Event in Biotechnology.
Visit bio-rad.com/explorer or contact us at bio-rad.com/explorercontactus for more information about adding biotechnology to your curriculum.

Provide Hands-On Medical Procedure Training for Your Students!

Our Approach
Training
Our training methodology uses skill acquisition theory to accelerate students to procedure competency.
- Reading material designed by clinicians
- High-quality videos of the procedure being done by an expert with easy-to-follow step-by-step instructions
- Students arrive at the classroom ready to practice the procedure in small groups

Assessment
- Procedure knowledge assessment via online exam
- Simulation-based exam evaluated by SimRated clinician raters resulting in a pass/fail score
- Narrative feedback
- Procedure specific simulation equipment and supplies in individual student boxes

Clinician Feedback & Certification
- SimRated connects your students to expert clinicians for assessment and feedback
- Successful passing of the assessments leads to industry-recognized digital certifications

Launching the Next Generation of Healthcare Providers

See Our Courses!
Explore the Power and Promise of Biotechnology

The Bio-Rad Explorer program supports science education and career exploration through its Biotechnology textbook, research-quality equipment, innovative and compelling hands-on laboratory activities, and award-winning resources and support.

We are proud to be the sponsor of the HOSA Competitive Event in Biotechnology, which encourages HOSA members to explore careers in biotechnology and understand how biotechnology will impact the future of medicine.

Come see us at the HOSA ILC!
- Expo booth — see our products, grab some posters, and get hands-on experience with some biotechnology techniques
- Workshop — Competitive Event in Biotechnology: Planning, Practice, and Q&A
- Workshop — Exploring Careers in Biotechnology

Visit bio-rad.com/HOSA to learn more about the HOSA Competitive Event in Biotechnology.

Visit bio-rad.com/explorer or contact us at bio-rad.com/explorercontactus for more information about adding biotechnology to your curriculum.
Conference Information

Hotel Property
Conduct at any HOSA function, whether it is a general session or in the cleanliness of a sleeping room, should make a positive contribution to the reputation of HOSA. Advisors should check rooms before departure from the hotel to ensure that they are left in good condition. Delegates are responsible for any vandalism to hotel rooms or property and will be expected to pay any and all damages incurred.

HOSA Conference App
The HOSA conference app can be downloaded from the Apple App Store or Google Play. The app will be used to relay important conference updates, competitive event round two postings, and have interactive maps of the hotel and convention center meeting space. Use the QR code to directly download the conference app. Your account can be accessed with the email address used in your HOSA Affiliation. If you do not know that address, a new account can be created.

Conference Name Badges
Conference name badges must be worn at all times. For conference activities, wear your name badge in plain sight to ensure your admittance to conference functions. The name badge serves as the entry to all official conference functions including general sessions, business session, workshops, and for bus transportation to competitive event sites. Name badges are vital to HOSA’s ILC Security plan. No name badge, no admittance to ILC functions. For security purposes, do not wear the conference badge while touring the city. Replacement badges are $5 and can be obtained at the Conference Headquarters with proper identification.

General Sessions
Delegates must have a name badge with a QR code that will be scanned to attend the Opening General Session, Recognition Session, and the Awards Session. Only registered delegates and guests may attend the General Sessions and entertainment activities.

Educational Symposium and Workshops
Your conference name badge will serve as your admission to all Educational Symposiums and entertainment activities. Please remember that seating for Educational Symposiums is on a first-come, first-served basis while space is available.

Local and State Advisors’ Orientation Meeting
All local and state advisors are encouraged to attend the orientation meeting on Wednesday. All conference chairmen will be present. Any changes in the program will be given at this time. This orientation is provided to ensure a smooth-running competitive events program and conference. In addition, first-time advisors are invited to participate in the New Advisor Coffee Talk Wednesday morning.

Voting Delegates
Each voting delegate will receive a voting delegate ribbon from his/her state advisor. All voting delegates are required to attend the Voting Delegate Activities including the Orientation. Meet the Candidates Breakfast and the Business Session. Voting Delegates should be seated in the voting delegate area at least ten minutes prior to the start of the Business Session. Official HOSA Uniform or blue or black suit must be worn. Voting Delegates should also bring a mobile device (i.e. smartphone or tablet) in order to participate in the eVoting ballot.

Executive Council Campaigning
Verbal campaigning may begin after the officer candidate slate is announced by the Nominating Committee. All conference delegates are invited to meet the candidates during the Open Forum on Thursday.

Reproduction of Photographs
As a delegate to the International Leadership Conference, permission is granted to make photographs, videotapes, broadcasts, and/or sound recordings, separately or in combination, available for reproduction for educational and promotional purposes by HOSA unless you put in writing this exception.

Conference Safety and Security
At Downtown Dallas, Inc. (DDI), they work every day to ensure the safety of visitors which includes making sure the Downtown area remains one of the safest in the city. That’s why they work directly with the Dallas Police Department, DART Police, Downtown Security Directors Association, and other safety organizations to address public safety issues and coordinate efforts. In fact, they contribute more than $4 million annually to public safety programs. If you ever need an escort or feel unsafe please call the DDI dispatch at 214.741.1151.

DDI provides a free app available to the public that enables users to safely and securely communicate with Downtown Security and Clean Team for non-emergency issues, providing real-time information on concerns or issues. With the See Say app, Downtown has a simple way to anonymously report safety or cleanliness concerns instantaneously through a smartphone. The See Say app empowers people to take an active role in keeping their community clean and safe by reporting what they see. To download the app on the App Store for iOS, or Google Play search See Say.
## Conference Staff
### Conference Directors
- Marcus Henderson, Chair, HOSA, Inc. Board of Directors
- Jim Koeninger, Ph.D., Executive Director
- Sarah Walters, Deputy Executive Director
- Mark Thomas, Headquarters Chief of Staff
- Jeff Koeninger, Director
- Laura Sheppard, Senior Director
- Karen Koeninger, Director, Partnerships and Sponsorships
- Bobby Crandall, Deputy Director, Partnerships and Sponsorships
- Hope Antrim, Director of Finance
- Jason Koeninger, International Executive Council Coordinator
- Christine Kim, Director, New State Advisor Development
- Janet Nelson, Director, NGL-ATC Testing Center

### Conference Headquarters
- Julie Abbott, Administrator
- Santina Cherian, CE Headquarters
- Vivian Do, CE Headquarters
- Jason Fillo, CE Headquarters
- David Kelly, CE Headquarters
- Cole Koeninger, CE Headquarters
- Samantha Lehman, CE Headquarters
- Maya Parks, CE Headquarters
- Cassie Springer, CE Headquarters

### HOSA Leadership
- Mark Burley, Director of Leadership Development
- Khalil Tubbs, Facilitator
- Abi Varghese, Facilitator

## Special Projects
- Marge Booden, NGL-ATC Testing Center
- Paul Booden, NGL-ATC Testing Center
- Elizabeth Bullock, HOSA Conference Headquarters

Win a $20,000 Body Interact license for your school!

How to participate?
- Gather a team of up to 4 students
- Bring your Advisor
- Show up at the Body Interact booth
- Register on site
- Solve a virtual patient scenario

Visit the Body Interact booth at ILC and solve a virtual patient scenario for a truly unique learning experience!

Plus, you'll have the chance to win a free Body Interact license for your school. Step into the world of virtual patients and see what it's like to act as a real healthcare professional!

Competition Schedule
- Elimination rounds
  June 21 and 22 | 10:00 am - 5:00 pm
- Final round
  June 23 | 10:30 am

Are you an Advisor?
Discover how Body Interact is advancing Health Science teaching with Virtual Patients. Join our Educational Symposium!

Check the ILC schedule for date and time.

HOSA 2023
SPECIAL AWARDS

CADUCEUS AWARD
The nominee (individual or group) has demonstrated extraordinary leadership in promoting HOSA as the pipeline for young people to the health professions. This award recognizes the importance of health industry leadership in working collaboratively to assure a qualified healthcare workforce for the future.

Amy Price, RN, MSN (AL) currently serves as the Chief Nursing Officer and Chief Operating Officer at Coosa Valley Medical Center in Sylacauga, Alabama. Mrs. Price was a two term, gubernatorial appointee to the Alabama Board of Nursing from 2009-2016, serves on the Sylacauga City Board of Education, the B.B. Comer Memorial Library Board of Directors, Sylacauga City Schools Foundation Board, and as an advisory board member for Sylacauga High School's HOSA chapter. Mrs. Price has served Alabama HOSA at both the local chapter and state levels. She currently serves as Chair of the Alabama HOSA Board of Directors.

ABOVE AND BEYOND AWARD
The nominee has “exceeded expectations” in service to HOSA-Future Health Professionals at chapter, chartered association, or international level.

Dr. Brent Vinson, DPT (AL) began advocating for Health Sciences education over ten years ago when he saw a need to have access to Health Science courses, credentials, and internship opportunities for students in Elmore County, Alabama. Dr. Vinson continues to serve as an advisor to Elmore County schools as well as the local CTE center where he chartered Health Science and HOSA into the high schools. He currently serves as a charter member of the Alabama Health Science/HOSA Board of Directors, a member of Health Science CTE Course of Study Committee, and volunteers his time to HOSA as a judge for the Physical Therapy Event.

Dr. Bill Walker, MD (MI) is a board-certified Forensic Pathologist with a deep commitment to HOSA and training future health professionals. Dr. Walker has gone above and beyond in his service to HOSA, both in Michigan for over 20 years and at the International Leadership Conference where he has served as the lead HOSA Bowl moderator for the past 12 years. In addition to HOSA Bowl, he has volunteered numerous years as the Medical Spelling pronouncer, consultant to the Forensic Science competition, and as a judge in other competitive events. Dr. Walker has also shared his knowledge in ILC educational symposiums over the years - he truly has a humble and servant heart and HOSA is a better organization because of his support.

EDUCATIONAL EXCELLENCE AWARD
The nominee (educator or educational agency) has demonstrated extraordinary leadership in the educational community at an international or chartered association level. The recipient’s vision and support enhance HOSA’s ability to integrate HOSA into the classroom by providing opportunities and experiences; thereby helping HOSA members achieve their educational goals to become future health professionals.

Anthony Caldwell, EMT (AL) is the Health Sciences Dual Enrollment at Southern Union State Community College for all three campus locations. As a former secondary Health Science teacher and HOSA Advisor for four years, Anthony Caldwell continues his passion for learning and industry exposure through his current role. Mr. Caldwell serves as a charter member on the Alabama Health Science/HOSA Board of Directors as Vice Chairman, provides CEU training for advisors with EMS credentials, and serves as a judge for Competitive Events.
Dr. Yolanda Wimberly, MD (GA) became a HOSA healthcare partner in January of 2023. As the Senior Vice President, Chief Health Equity Officer at Grady Health and Morehouse School of Medicine Senior Associate Dean of Clinical Affairs at Grady Hospital, she organized 17 career specialties to be available to Georgia HOSA members for Q&A, a workshop featuring the Grady Mobile Stroke Unit, exhibit booths and an array of other benefits to HOSA members in attendance at the Georgia HOSA SLC. Impressed by her experience, Dr. Wimberly is already planning ways to expand her HOSA involvement in the future.

Dr. Barbara Wall (GA) is the Deputy Superintendent of Career, Technical, and Agricultural Education at the Georgia Department of Education. Dr. Wall continually offers to support the CTSO Directors, provides resources to the membership of these organizations, and champions the cause of Career Technical Student Organizations. Dr. Wall created the Golden Key award to recognize Local Advisors who meet one or more of the key core values of Career, Technical, & Agricultural Education involvement in the future.

Lisa Dyer, Emergency Medical Services director at Kiamichi Technology Center in Poteau, teaches paramedics along with her colleague, Kelly Higdon. The two chaperoned a group of six adult, postsecondary students, Ashley Newman, Dee McQuate, Dalton Mahoney, Katey Lawson, Ethan Flynt, and Aaron Lindsey to the 2022 HOSA International Leadership Conference. The students - three from KTC, one from Northwest Technology Center and another from Central Technology Center - are certified emergency medical technicians studying to be paramedics, the highest level of emergency caregiver pre-hospital. As the Oklahoma group prepared to leave their hotel, Dyer and the students heard a woman scream. With coincidentally precise timing, a police officer showed up, responding to what he initially believed was an unrelated call. The students and officer were approached by two severely injured victims emerging from a nearby wooded area. The paramedic students, dressed in their blue HOSA uniform suits and white shirts, immediately ran toward the victims to provide lifesaving first aid. Although critically wounded, both victims were expected to survive, thanks to the quick, professional work of the students.

Lola Levin (WI) is a Wisconsin HOSA member who works as a lifeguard in her local community. While on duty, Lola Levin noticed a disoriented child in the kiddie pool. Lola made a split-second decision when the child became unresponsive at the base of a small slide. She immediately pulled the child out of the pool and performed CPR, successfully saving the child’s life. Lola received special recognition from the City of Appleton for her heroism.
HOSA OUTSTANDING PROFESSIONAL ASSOCIATION

HOSA-Future Health Professionals is forever grateful to the American Physical Therapy Association for always proving to be a “gold standard of excellence” as one of HOSA’s Elite Partners over the past decade and, most recently, Premier Partner.

As a role model in association and educational excellence, APTA is recognized for their partnership to ensure the best possible physical therapy competitive event through reference recommendations, rubric review, judging, and video alignment to help advance the profession of physical therapist.

As well as the improvement of HOSA’s physical therapy skill event, APTA’s leadership finds ways for win-win relationships – hosting events; recommending HOSA as “the” pipeline partner to other associations and business leaders; and inviting HOSA members to be involved in APTA activities are only a few of the significant contributions APTA has made that add to HOSA’s success. A special thanks for an exceptional partnership that has led to HOSA’s 2023 Hall of Fame Health Industry Partner.

HOSA OUTSTANDING CORPORATE AWARD

HOSA and HCA leadership met in 2003 focused on HOSA’s ability to attract a diverse workforce in secondary programs to pursue careers in nursing to offset shortages. In 2003, Philip R. Patton, an HCA Senior HR Vice President, died in a plane accident. HCA honored Mr. Patton by providing six $1,000 scholarships to HOSA members entering a nursing program. The remainder of the $10,000 donation was used to sponsor a HOSA competitive event. From 2005 to 2007, HCA provided $15,000 to sponsor 10-$1,000 scholarships and sponsorship of the HOSA, Inc. Corporate Meeting. In 2008 to 2023, HCA sponsored 15-$1,000 scholarships annually. From 2003 to 2023, HCA awarded 261-$1,000 Philip R. Patton Scholarships to deserving, highly qualified, and diverse future health professionals entering the nursing career field.

Thank you for the opportunities to serve one of America’s premier hospital corporations committed to high educational and employment standards through its commitment to the continuous improvement of healthcare and wellness. We look forward to pursuing new opportunities to connect HCA professionals with HOSA future health professionals to improve their opportunities to develop, practice, and refine their skills to serve patients to the best of their abilities.
The HOSA Hall of Fame recognizes one chartered association advisor, one local advisor, one member, one alumnus and one health industry partner who have rendered outstanding service to HOSA, health and biomedical science education and the health industry.

**CHARTERED ASSOCIATION ADVISOR**

**Candy Leopold (MN)**

served Minnesota HOSA for 31 years with love, passion, and dedication. Her selfless commitment and support to HOSA continues into her retirement. During her tenure, she played a crucial part in the growth of HOSA and establishing the foundation for HOSA’s partnership with the Medical Reserve Corps with Minnesota being the first chartered association to offer the federal program.

**CHARTERED ASSOCIATION ADVISOR**

**Janice Atkinson (WI)**

served as the Wisconsin Health Science State Consultant and Wisconsin HOSA State Advisor from 2008-2018. During her tenure as HOSA State Advisor, Mrs. Atkinson was instrumental in expanding Wisconsin HOSA state association by over 2,000 members. She also served the HOSA International Competitive Events team as Event Manager, Judge, Lieutenant, and Chair of Leadership Events from 2010-2018. In addition to her role and involvement with HOSA as State Advisor, Mrs. Atkinson also concurrently served as the Health Science Education State Consultant with the Department of Public Instruction. A former State Officer once described how Mrs. Atkinson’s “relentless dedication, limitless compassion, and infinite wisdom, made her an unsung leader.”

**LOCAL ADVISOR**

**Bill Neiss (MN)**

has been a teacher, local HOSA advisor, OEC Director and MN HOSA Board member for over 30 years. Not only is Mr. Neiss an incredible mentor to his current students, but he is notorious for keeping tabs on alumni to ensure they are living and working to their true potential. He is described by his colleagues as “a true mentor, advisor, friend, advocate and teacher with a mission-focused drive and determination to make everyone he meets feel welcome.”

**MEMBER**

**Tom Punnen (TX)** served as President of Texas HOSA, leading the chartered association during the tough challenges COVID-19 brought. Tom went on to serve HOSA-Future Health Professionals as Western Region Vice President on the International Executive Council from 2021-2022, where he supported content creation and social media strategy and spearheaded engagement and the IEC’s relationship with all things Be The Match. Tom’s efforts and commitment to HOSA-Future Health Professionals continued after his term, where he successfully ignited the HOSA chapter at Rice University, has planned several events to enhance awareness about HOSA’s service project, Be The Match, as well as the many benefits the organization lends to postsecondary/collegiate members across the globe.

**ALUMNI**

**Nate Thomas, RRT (GA)**

has demonstrated an enthusiastic commitment to HOSA since becoming a HOSA member at Locust Grove High School in 2009 and serving as a Georgia HOSA State Officer in 2011. Mr. Thomas joined the Georgia HOSA Staff as the State Officer Coach in 2021 where he develops the State Officers into the true leaders they can be. In addition to his work with Georgia HOSA, Mr. Thomas consults with officer coaches from other state associations to create a diverse and knowledgeable team of coaches pouring into each other as they encourage the next generation of leaders. Mr. Thomas is a Registered Respiratory Therapist and is currently working on a travel assignment in a NICU in Colorado.
Immerse yourself in real anatomy

Learning anatomy isn’t easy. But with Toltech’s innovative VH Dissector platform that features real imagery, anatomy education becomes more impactful, successful, and fun.

Our innovative technology solutions and high-quality, high-fidelity real visualizations take labs, lectures, and clinical discussions to the next level.

Virtual reality
Increase comprehension of complex structural relationships by adding depth to real anatomical visualizations.

Computers and tablets
Access fully interactive, real human anatomy on any device – anytime, anywhere.

Dissection table
Interact with human anatomy and collaborate with peers in an ideal environment for group learning.

Experience anatomy like never before
Stop by the Toltech booth to try out our VR experience, cheer on tournament participants, and see how our cutting-edge visualizations bring content to life.

Deploy high-impact, highly immersive learning anytime, anywhere
Want to see how Toltech can improve anatomy education across devices, classes, and campuses? Explore the Toltech platform and learn how you can get started today.
OSHA 10-HOUR GENERAL INDUSTRY (HEALTHCARE)

Go Dental! Discover Dentistry Tips

Stay motivated and inspired on your path to a dental career by remembering the phrase Go Dental! Each letter represents an action to help you prepare for your future. Start now and you will be set up for success!

**D**ISCOVER—There are more than 75 dental schools in the United States and Canada. Use the ADEA Official Guide to Dental Schools to research what makes each school unique.

**E**NGAGE—Start talking to friends and family about dentistry. Join or start a predental club to connect with others who are interested in the profession.

**N**AVIGATE—Visit adea.org/godental to sign up for the ADEA GoDental newsletter and start your dental career journey.

**T**AILOR—Adjust your schedule to start taking STEM courses so you are on track to complete your prerequisite requirements for dental school.

**A**PPLY—Many dental schools require applicants to have hands-on experience. A part-time job in a dental office or summer enrichment program are good ways to discover if dentistry is the right path for you.

**L**ISTEN—Listen to others who have taken this journey. Attend free ADEA GoDental events to hear about others’ experiences and connect with dental students, admissions staff and practitioners.

Remember to have fun along the way! Exploring your future can be informative and exciting!
